

Top Mounting Liquid Level Switch

Features

- Low cost
- Easy to install
- Reliable switching

Specification

Switch rating	0.5A @ 240Vac / 200Vdc, SPST	
Contact	N/O, Reversible	
Material	Cable	PVC
	Float	Nylon
	Weight	Polyethylene
Tank fixing	1 ¼" BSP	
Cable length	5m	
Specific gravity	0.8	
Max. pressure	4kg/cm ²	
Operating temperature	-20 to 80°C	
Dimensions	94 x 25mm dia.	
Country Of Origin	Taiwan	

Product Codes

LS-TM

Reversible top mounting liquid level switch

Technical Overview

The LS-TM is an easy to install top mounting level switch, and has a reversible float so that it can be used for either high or low level alarms. The float is suspended from a 5 meter PVC cable with a polyethylene weight and is fully submersible and adjustable.

Installation

The switch should be installed by suitably qualified personnel only. Electrical termination should be carried out by a suitably qualified electrician in accordance with prevailing regulations.

Fit a 1¼" boss to the top of the tank, or alternatively remove the fitting and replace with a cable gland.

The switch is provided with the switch in the normally open position, so will close on rise. To change this gently remove the spring circlip and reverse float.
